

Brussels, 23 February 2021

**COMMITMENT OF UAS4EUROPE TO THE UNITED NATIONS SUSTAINABLE
DEVELOPMENT GOALS**

UAS4EUROPE, the voice of European Universities of Applied Sciences (UAS) in research and innovation, hereby expresses its commitment to the Sustainable Development Goals (SDGs) and the ambition to work on the SDGs with its partner organisations in applied research and innovation in Europe.

Sustainability will be the key driver in developing future-proof UAS, and research and education sit at the core of all UAS4EUROPE partners. UAS have a strong link with society by working closely together with regional partners. The regional embedding in research leads to constant improvement in the education curriculum, which in return leads to students better equipped to enter a future-proof labour market. By focusing on learning, research, governance and external leadership, UAS4EUROPE partners fully commit to the SDGs. On behalf of its nine partner organisations, UAS4EUROPE will use its position in Europe to strengthen the role and visibility of UAS in their commitment to the SDGs.

As signed on 23 February 2021.
